

SAFETY DATA SHEET

1. Identification

Product identifier	Extreme Duty Food Grade Grease		
Other means of identification			
Product code	SL35615, SL35616, SL35617, SL35618		
Recommended use	Lubricating grease		
Recommended restrictions	None known.		
Manufacturer/Importer/Supplier/	Distributor information		
Manufactured or sold by:			
Company name	CRC Industries, Inc.		
Address	885 Louis Dr.		
Talanhana	Warminster, PA 18974 US		
Telephone General Information	215-674-4300		
Technical	800-521-3168		
Assistance			
Customer Service	800-272-4620		
24-Hour Emergency	800-424-9300 (US)		
(CHEMTREC) Website	703-527-3887 (International) www.crcindustries.com		
2. Hazard(s) identification			
Physical hazards	Not classified.		
Health hazards	Serious eye damage/eye irritation	Category 2A	
	Sensitization, skin	Category 1	
Environmental hazards	Not classified.		
OSHA defined hazards	Not classified.		
Label elements			
	$\mathbf{\vee}$		
Signal word	Warning		
Hazard statement	May cause an allergic skin reaction. Causes s	serious eye irritation.	
Precautionary statement			
Prevention	Avoid breathing vapors. Contaminated work clothing must not be allowed out of the workplace. Wear protective gloves and eye/face protection. Wash thoroughly after handling.		
Response	If on skin: Wash with plenty of water. If skin irritation or rash occurs: Get medical attention. Wash contaminated clothing before reuse. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.		
Storage	Store away from incompatible materials.		
Disposal	Dispose of contents/container in accordance	with local/regional/national regulations.	
Hazard(s) not otherwise classified (HNOC)	None known.		

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
White mineral oil		8042-47-5	40 - 70

Chemical name	Common name and synonyms	CAS number	%
Benzene, mono-C10-13-alkyl derivs., fractionation bottoms, heavy ends, sulfonated, calcium salts		148520-84-7	10 - 30
Calcium dodecylbenzenesulphonate		26264-06-2	1 - 5
Diboron calcium tetraoxide		13701-64-9	1 - 5

Specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures	
Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, give artificial respiration. If breathing is difficult, trained personnel should give oxygen. Get medical attention if symptoms occur.
Skin contact	Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.
Eye contact	Rinse immediately with plenty of water, also under the eyelids. Remove contact lenses, if present and easy to do. Continue to rinse for at least 15 minutes. Get medical attention if irritation develops and persists.
Ingestion	Rinse mouth. Drink 1 or 2 glasses of water. Never give anything by mouth to a victim who is unconscious or is having convulsions. Do not induce vomiting without advice from poison control center. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Get medical attention if symptoms occur. If ingestion of a large amount does occur, call a poison control center immediately.
Most important symptoms/effects, acute and delayed	Rash. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Skin irritation. May cause an allergic skin reaction. Dermatitis.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wash contaminated clothing before reuse.
5. Fire-fighting measures	
Suitable extinguishing media	Use fire-extinguishing media appropriate for surrounding materials.
Unsuitable extinguishing media	None known.

Specific hazards arising from During fire, gases hazardous to health may be formed. **the chemical**

Special protective equipment Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.

Cool containers exposed to heat with water spray and remove container, if no risk is involved.

No unusual fire or explosion hazards noted.

6. Accidental release measures

Fire-fighting

equipment/instructions General fire hazards

Personal precautions,
protective equipment and
emergency proceduresKeep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of
low areas. Wear appropriate protective equipment and clothing during clean-up. Do not touch
damaged containers or spilled material unless wearing appropriate protective clothing. Ensure
adequate ventilation. Local authorities should be advised if significant spillages cannot be
contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up	The product is immiscible with water and will spread on the water surface.	
containing up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.	
	Small Spills: Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean surface thoroughly to remove residual contamination.	
	Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS. Prevent entry into waterways, sewer, basements or confined areas.	
Environmental precautions	Avoid discharge into drains, water courses or onto the ground. Use appropriate containment to avoid environmental contamination. Inform appropriate managerial or supervisory personnel of all environmental releases.	
7. Handling and storage		
Precautions for safe handling	Do not get in eyes, on skin, or on clothing. Avoid prolonged exposure. When using, do not eat, drink or smoke. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Wash hands after handling and before eating. Wash contaminated clothing before reuse. Observe good industrial hygiene practices. Use appropriate container to avoid environmental contamination. For product usage instructions, please see the product label.	
Conditions for safe storage, including any incompatibilities	Keep away from heat and sources of ignition. Store in a cool, dry place out of direct sunlight. Keep container tightly closed. Store in a well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS).	

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000) Form Туре Value Components PEL White mineral oil (CAS 5 mg/m3 Mist. 8042-47-5) **US. ACGIH Threshold Limit Values** Value Form Components Type White mineral oil (CAS TWA 5 mg/m3 Inhalable fraction. 8042-47-5) **US. NIOSH: Pocket Guide to Chemical Hazards** Components Туре Value Form STEL White mineral oil (CAS 10 mg/m3 Mist. 8042-47-5) TWA 5 mg/m3 Mist. No biological exposure limits noted for the ingredient(s). **Biological limit values** Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates Appropriate engineering

controls should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Occupational exposure limits

Eye/face protection	Wear safety glasses with side shields (or goggles).		
Skin protection			
Hand protection	Wear protective gloves such as: Latex.		
Other	Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.		
Respiratory protection If engineering controls are not feasible or if exposure exceeds the applicable exposure lin NIOSH-approved cartridge respirator with an organic vapor cartridge. Use a self-containe breathing apparatus in confined spaces and for emergencies. Air monitoring is needed to determine actual employee exposure levels.			
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.		
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.		

9. Physical and chemical properties

Э	. Fliysical and chemical	properties
A	opearance	
	Physical state	Solid.
	Form	Grease.
	Color	Tan.
0	dor	Mild. Petroleum.
0	dor threshold	Not available.
pł	1	Not available.
M	elting point/freezing point	Not available.
	itial boiling point and boiling nge	450 °F (232.2 °C) estimated
FI	ash point	> 356 °F (> 180 °C) Cleveland Open Cup
E١	vaporation rate	Very slow.
FI	ammability (solid, gas)	Not available.
U	oper/lower flammability or exp	losive limits
	Flammability limit - lower (%)	Not available.
	Flammability limit - upper (%)	Not available.
Va	apor pressure	1.2 hPa estimated
Va	apor density	> 0.5 (air = 1)
Re	elative density	0.96
So	blubility (water)	Insoluble.
	artition coefficient -octanol/water)	Not available.
A	uto-ignition temperature	500 °F (260 °C) estimated
De	ecomposition temperature	Not available.
Vi	scosity (kinematic)	0.9 - 1.5 cm²/s (104 °F (40 °C))
Pe	ercent volatile	Not available.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	Carbon oxides. Sulfur oxides. Metal oxides.

11. Toxicological information

Information on likely routes of e	exposure			
Ingestion	Expected to be a low ingestion hazard.			
Inhalation	Prolonged or excessive inhalation may cause respiratory tract irritation. Prolonged inhalation may be harmful.			
Skin contact	May cause an allergic skin reaction.			
Eye contact	Causes serious eye irritation.			
Symptoms related to the physical, chemical and toxicological characteristics	Rash. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Skin irritation. May cause an allergic skin reaction. Dermatitis.			
Information on toxicological officito				

Information on toxicological effects

Acute toxicity

May cause an allergic skin reaction.

Skin sensitization May cause an allergic skin reaction. Germ cell mutagenicity No data available to indicate product or any components present at greater than 0.1% are mutagenicity generative components. Carcinogenicity This product is not considered to be a carcinogen by IARC, ACGIH, NTP, or OSHA. IARC Monographs. Overall Evaluation of Carcinogenicity White mineral oil (CAS 8042-47-5) 3 Not classifiable as to carcinogenicity to humans. Specific target organ toxicity - single exposure Not classified. Specific target organ toxicity - repeated exposure Specific target organ toxicity - repeated exposure Not classified. Frepeated exposure Aspiration hazard Not likely, due to the form of the product. Chronic effects Prolonged inhalation may be harmful. 12. Ecological information Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment possibility that large or frequent spills can have a harmful or damaging effect on the environment possibility that large or frequent spills can have a harmful or damaging effect on the environment possibility that large or frequent spills can have a harmful or damaging effect on the environment possibility that large or frequent spills can have a harmful or damaging effect on the environment possibility that large or frequent spills can have a harmful or damaging effect on the environment possibility that large or frequent spills can have a harmful or damaging effect o	Product	Species	Test Results	
Oral LDS0 Rat 7960 g/kg, 14 days estimated * Estimates for product may be based on additional component data not shown. Skin corrosion/intration Prolonged skin contact may cause temporary irritation. Skin corrosion/intration Causes serious eye irritation. Skin sensitization Not available. Skin sensitization May cause an allergic skin reaction. Skin sensitization May cause an allergic skin reaction. Gern coll mutagenicity Not available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic. Garcinogenicity This product is not considered to be a carcinogen by IARC, ACGIH, NTP, or OSHA. IARC Monographs. Overall Evaluation of Carcinogenicity 3 Not classifiable as to carcinogenicity to humans. Reproductive toxicity This product is not expected to cause reproductive or developmental effects. Specific target organ toxicity - single exposure Not classified. Specific target organ toxicity - solonged inhalation may be harmful. Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environmental effects (e.g. ozone depletion, photochemical ozone creation potential endocrine disruption, global warming potential) are expected from this component. Disposal considerations This product is not a RCRA hazardous waste (See 40 CFR Part 261.20 – 261.33). Empty containers may be recycled. Collect and reclaim or dispose in sealed containers at licensed was disposal site. Dispose in accordance with all applicable regulations. Hazardous waste code Not regulated. Contaminated packaging Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container emptied. 14. Transport information Dor DOT Not regulated as dangerous goods. IATA Not regulated as dangerous goods.	Aspiration hazard	Not likely, due to the form of the product.		
Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environmer Persistence and degradability Not readily biodegradable. Bioaccumulative potential No data available. Mobility in soil No data available. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component. 13. Disposal considerations This product is not a RCRA hazardous waste (See 40 CFR Part 261.20 – 261.33). Empty containers may be recycled. Collect and reclaim or dispose in sealed containers at licensed was disposal site. Dispose in accordance with all applicable regulations. Hazardous waste code Not regulated. Contaminated packaging Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container emptied. 14. Transport information DOT Not regulated as dangerous goods. Not regulated as dangerous goods. IMAG Not regulated as dangerous goods.	Chronic effects	Prolonged inhalation may be ha	rmful.
