---

---

### **Section 5: Fire-Fighting Measures**

---

---

**Flammable Properties:** This product is extremely flammable in accordance with aerosol flammability definitions.

Flash Point: 430°F / 221°C (COC)      Upper Explosive Limit: 7.0  
Autoignition Temperature: > 500°F / > 260°C      Lower Explosive Limit: 0.9

**Fire and Explosion Data:**

**Suitable Extinguishing Media:** Foam, dry powder, Halon®, carbon dioxide, sand, earth & water mist. Do not use water jet.

**Products of Combustion:** Smoke, soot, hydrocarbons, and oxides of carbon

**Explosion Hazards:** Aerosol containers, when exposed to heat from fire, may build pressure and explode. Vapors may accumulate in a confined space and create a flammable atmosphere.

**Protection of Fire-Fighters:** Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against suffocation and possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool and to knock down vapors which may result from product decomposition.

---

---

### **Section 6: Accidental Release Measures**

---

---

**Personal Precautions:** Use personal protection recommended in Section 8.

**Product Name: Copper Anti-Seize and Lubricating Compound**

**Product Number (s): 72095**

**Environmental Precautions:** Take precautions to prevent contamination of ground and surface waters. Do not flush into sewers or storm drains.

**Methods for Containment & Clean-up:** Remove all sources of ignition. Dike area to contain spill. Ventilate the area with fresh air. If in confined space or limited air circulation area, clean-up workers should wear appropriate respiratory protection. Recover or absorb spilled material using an absorbent designed for chemical spills. Place used absorbents into proper waste containers.

---

---

## **Section 7: Handling and Storage**

---

---

**Handling Procedures:** Do not use near sources of ignition. Provide adequate ventilation during use. Wear appropriate personal protective equipment. Use caution around energized equipment. The metal container will conduct electricity if it contacts a live source. This may result in injury to the user from electrical shock and/or flash fire. For product use instructions, please see the product label.

**Storage Procedures:** Store in a cool dry area out of direct sunlight. Aerosol cans must be maintained below 120°F / 49°C to prevent cans from rupturing.

**Aerosol Storage Level:** III

---

---

## **Section 8: Exposure Controls/Personal Protection**

---

---

**Exposure Guidelines:**

COMPONENT	OSHA		ACGIH		OTHER		UNIT
	TWA	STEL	TWA	STEL	TWA	SOURCE	
Petroleum oil	5*	NE	5*	NE	NE		mg/m <sup>3</sup>
Petroleum solvent	300	NE	300	NE	NE		ppm
Nonhazardous blend	NE	NE	NE	NE	NE		
Graphite	2.5 (v)	NE	2	NE	2.5	NIOSH	mg/m <sup>3</sup>
Copper powder	1	NE	0.1	NE	1	NIOSH	mg/m <sup>3</sup>
Hydrocarbon propellant	1000	NE	1000	NE	NE		ppm

N.E. – Not Established      (c) – ceiling      (s) – skin      (v) – vacated      \* – oil mist

**Controls and Protection:**

**Engineering Controls:** Area should have ventilation to provide fresh air. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at the source, preventing dispersion into the general work area. Use mechanical means if necessary to maintain vapor levels below the exposure guidelines. If working in a confined space, follow applicable OSHA regulations.

**Respiratory Protection:** None required for normal work where adequate ventilation is provided. If engineering controls are not feasible or if exposure exceeds the applicable exposure limits, use a NIOSH-approved cartridge respirator with organic vapor cartridge. Air monitoring is needed to determine actual employee exposure levels. Use a self-contained breathing apparatus in confined spaces and for emergencies.

**Eye/face Protection:** For normal conditions, wear safety glasses. Where there is reasonable probability of liquid contact, wear splash-proof goggles.

**Skin Protection:** Use protective gloves such as nitrile or PVC. Also, use full protective clothing if there is

**Product Number (s): 72095**

prolonged or repeated contact of liquid with skin.
